

With our Christmas season builds and de-rig bookings for January now booked in, our thoughts already move to the first few months of 2024, pre the summer season and keeping our team busy. As well as being keen to seek new event opportunities in these months, now is also the time to start speaking to us about your event sites for enabling & preliminary works and installs, be it semi-permanent or permanent.

Many event sites and host venues are able to adapt and install stone roadways, concrete bell mouth entrances, new gates, draw pits and ducting or similar, perhaps just remodel areas of their sites to better suit event uses, removal of dead trees, stumps and over grown shrubs, it is always worth discussing this with your venues, as some small investment to sites can save temporary hire cost over combined years and can dramatically improve infrastructure and delivery of your event. MLD are perfectly placed with our skill sets and back grounds in both the construction and event industries to undertake these works and looking to discuss potential opportunities. Landscaping, turfing and lawn remodelling, roadways, kerbs and borders, draw pits & ducting, perimeter fences, farm gates, security gates, mains water connections and cable installs. Groundworks and general builds, skilled IPAF mewp operators, CPCS telehandler, Excavator and dumper operators. Come and see at the showmanshow stand 220 Avenue D or give us a call. Not just another crew, Event builders.
